Product Videos now Available on Website

Snap-on Equipment have offered videos about new machines or technologies for years. Those videos explain the technology and operation of the machines, visualise and emphasise their benefits and illustrate procedures such as mounting and demounting of tyres.

Owing to their unmistakable pictures and easy-to-understand texts in English and German those videos are a perfect tool for sales support. On the other hand they are also ideally suited to supply interesting and professional information to the interested public and customers at trade shows, in showrooms, or in the customer area of the garage.

To facilitate easy access to those videos for our customers, we have now made them available on our website: Simply click on www.snapon-equipment.eu to see all videos in English and German - including the latest one about the wdk certified roller-type tyre changer.

All videos are also available on CD.
