

## Don't purchase the pirated equipments of LAUNCH

Recently, many companies in China sell the copied equipments of LAUNCH, especially X431 Master and X-431 Diagun. These companies contact LAUNCH's distributors or end users and publicize widely for selling these copied equipments.

Please be more cautious of these copies and convince your customers not to buy. There must be problem with quality, software update and no guarantee in after-sales service.

The diagnostic tool of LAUNCH can be upgraded constantly and the new models are compatible with old ones. But these copied equipments have problem with software update.

Overseas version of X431 Master and X-431 Diagun is only sold to abroad. LAUNCH doesn't have any authorized distributor for overseas market in China. All agents for overseas market in China are illegal.

It must suffer law to buy and sell these copied equipments and now LAUNCH is meeting the Ministry of Public Security to combat piracy.

Please make sure to purchase the products from our authorized distributors or overseas branches all over the world (except in China).
